

Daniela from Austria

I like to make kites with paper and bamboo because these are natural materials. Also I take raffia and leaves in my kites. I never know how exactly the kite will look like in the end because it is rising by making. What I am feeling I try to transform – make uncover. When my kite is flying so I am connected to him/her with the line and I can feel freedom and peace in my heart and hang my souls in the sky. And I hope I can transmit my ideas and feelings anyway to other humans.
